Tenix Group

Senior Project Manager
Telstra and Sensis

A qualified and skilled Senior Project Manager/Development Manager with extensive construction and technology experience, Kavitha Vipulananda has a proven track record of managing the planning, implementing and delivery of construction projects on schedule and within budget.

With excellent verbal, written, communication and negotiation skills, Kavitha has a unique ability to analyse, understand and take control of the requirements of a construction project from start to finish.

Having worked in the construction, telecommunication, financial services and banking industries means Kavitha has proven experience applying Agile methodologies to the projects she manages.

Kavitha holds qualifications as a Structural Engineer and in Information Technology, giving her a cross-section of skills to draw from. The teams she works with find her to be detail-focused, reliable and highly methodical in her approach.

In 2020, Kavitha is applying her skills to complete at-risk and urgent construction projects. She is leveraging her previous experience in this area to help homeowners, home builders, banks and other lenders to 'rescue' projects and deliver outcomes that benefit all involved.

"There is always another option and solution to complete a project successfully. I'm highly driven to support my clients and help them find the best ways to continue to reach their goals." - Kavitha Vipulananda.
